

We are an experienced delivery team who have been involved in a number of deliveries.

We can deliver your vessel to anywhere in the world provided the vessel is capable of the journey.

Our delivery processes includes:-

- **Pre-departure inventory of the vessel**
- **Pre-departure safety review**
- **Review the service history of the vessel and recommend any work to be done prior to departure.**
- **Actual delivery of the vessel including providing other crew as needed and potentially required by law.**

On arrival at the destination port we will clean your vessel so that when you arrive it looks better than when you last saw it.

We are also happy to assist owners in the delivery of their vessel and provide basic training for the owners if they so wish.
